

Innovative Teaching Learning Method

Course:Machine Learning

AY:22-23

Group study in Research paper:

Students were asked to explore latest research papers in the field of machine learning and present their study followed by question answers to assess their understanding

Case study Based Learning Approach- In the course Machine learning Lab, Practical use cases were given for the implementation purpose to make them understand the applications of ML algorithms in real time/day to day life.

Outcome: Better understanding of algorithms with their applications in real world
